AUTHOR INDEX TO VOLUME 39

References with (A) are to abstracts of papers presented at meetings of the Physical Society and references with (L) are to Letters to the Editor.

Ahlberg, J. Elston and Simon Freed. Specific heat and electronic activation in crystals—540(L)

Albertson, Walter. On the classification of certain lines of radium—385(L)

Allen, C. W. Broad lines in the arc spectrum of copper—42

——— Intensity of quartet lines in the arc spectrum of copper—55

Almy, G. M. and C. D. Hause. Band spectrum of potassium hydride—178(A)

Angus, W. Rogie. Diamagnetic susceptibility of the rare gas atoms according to Slater's method—844(L)

Ashley, Muriel (see Jenkins, F. A.)—552(A)

Babcock, Harold D. and Wendell P. Hoge. New measurements of the 1,1 band of atmospheric oxygen—550(A)

Badger, Richard M. (see Woo, Sho-Chow)—932

Bailey, C. R. and A. B. D. Cassie. Molecular configuration of N_2O—534(L)

Bainbridge, Kenneth T. Isotopic constitution of zinc—847(L)

——— Constitution of tellurium—1021(L)

Ballard, S. S. (see White, H. E.)—545(A)

Banta, H. E. The change in thermal e.m.f. produced by a magnetic field—862(A)

Bardeen, John (see Peters, Leo J.)—870(A)

Barnes, R. Bowling. Far infrared transmissions of various solids—870(A)

——— Measurements in the long wave-length infrared from 20μ to 135μ—562

Barreca, Pasquale. On the entropy of the universe—533(L)

Barrett, Charles S. and Carl E. Howe. Distribution of x-ray reflecting power in quartz crystals—177(A)

——— **and Carl E. Howe.** X-ray reflection from inhomogeneously strained quartz—889

Bartlett, J. H., Jr. (see Furry, W. H.)—186(A), 210

Barton, Donald C. Eotvos torsion balance—867(A)

Barton, H. A. (see Richtmyer, F. K.)—176(A)

Bateman, H. Book review—541

Beams, J. W. A simple ultracentrifuge—858(A)

Bear, Richard S. (see Spedding, Frank H.)—948

Bearden, J. A. Wave-length of the molybdenum and copper K series—860(A)

——— X-ray wave-lengths by the dispersion in quartz—1

Beardsley, Niel Freeborn. Approximate calculation of the lower energy levels of the carbon atom—913

Beck, Carl A. Hall effect on induced currents in circular disks of bismuth and antimony—185(A)

Bennett, R. D. (see Compton, A. H.)—873

Bennett, Willard H. Effect of the target on breakdown in cold emission—182(A)

Benz, Carl (see Poulter, Thos. C.)—190(A)

Bhagavantam, S. Infrared and Raman spectra of CS_2—1020(L)

Birge, Raymond T. Calculation of errors by the method of least squares—551(A)

——— Probable values of e, h, e/m and α—547(A)

Bitter, Francis. On the detection of inhomogeneities in the magnetization of iron—185(A)

——— On the interpretation of some ferromagnetic phenomena—337

——— On the verification of the theory of magnetization of single crystals—371

Bleakney, Walker. Additional evidence for an isotope of hydrogen of mass 2—536(L)

Boner, C. P. and Marian O. Boner. Generation of combination and harmonic frequencies by linear and non-linear vacuum tube circuits—863(A)

Boner, Marian O. (see Boner, C. P.)—863(A)

Bonner, T. W. Absorption and emission of sodium light by sodium flames—859(A)

Bourgin, D. G. The thin plate—870(A)

Bowen, I. S. Spectra of two and three-valence-electron atoms, Si II, P III, S IV, Si III, P IV and S V—8, 551(A)

Bowers, Harold E. (see Harkins, William D.)—182(A)

Bowie, R. M. (see Carr, P. H.)—858(A)

Bozorth, Richard M. Barkhausen effect: orientation of magnetization in elementary domains—353; discussion—375

——— **and F. E. Haworth.** The shot effect and electrical breakdown in insulators—845(L)

——— **and Linus Pauling.** The crystal structure of magnesium platinocyanide heptahydrate—537(L)

Bradbury, N. E. Absolute values for the mobilities of gaseous ions in pure gases—546(A)

Brady, James J. Photoelectric properties of thin films of rubidium and caesium on silver—546(A)

Bramley, Arthur. Absorption of γ rays—378(L)

——— β disintegration—188(A)

Breit, G. Dirac's equation and the spin-spin interactions of two electrons—616, 870(A)

Zachariasen, W. H. On the structure of vitreous oxides—185(A)
Zeleny, Anthony. An extension of the application and interpretation of the Faraday fluxes—857(A)
Zeleny, John. Book review—850
Zenor, Hughes (see Roller, Duane)—866(A)
Zirbel, N. N. and A. B. Bryan. Heat treatment of fine metallic suspensions—857(A)
Zisman, W. A. Effect of pressure on the electrical conductance of salt solutions in water—151

ANALYTIC SUBJECT INDEX TO VOLUME 39

References marked (A) are to abstracts of papers presented at meetings of the Physical Society, those marked with (L) are to Letters to the Editor.

Absorption coefficient (see also **X-rays, absorption, Collision diameter**)
For x-rays, A. Bramley—378(L)

Absorption of light (see also **Spectra, absorption**)
Absorption and emission of sodium light by sodium flames, T. W. Bonner—859(A)
By calcite in the infrared, S. Silverman—72
Continuous absorption by diatomic gases; temperature variation, G. E. Gibson—550(A); theory, G. E. Gibson, O. K. Rice—551(A)
In infrared by small particles, A. H. Pfund, S. Silverman—64
In infrared by various substances, R. B. Barnes—562, 870(A)
Temperature shift of the transmission band of Ag, J. V. Pennington—953

Acoustics
Effects of intense audio-frequency sounds, N. Gaines, L. A. Chambers—862(A)
Velocity of sound in a Fermi-Dirac or Einstein-Bose ideal gas, G. E. Uhlenbeck, E. A. Uehling —1014(L)
Velocity of sound in stratified formations, B. McCollum, F. A. Snell—868(A)
Velocity of sound in tubes, C. B. Vance—737

Activated gases
Active nitrogen, Joseph Kaplan—860(A)

Afterglow
Duration in nitrogen, Charles T. Knipp—181(A)
"Flash" in the afterglow of argon, Charles T. Knipp—871(A)

Alpha-particles (see also **Radioactivity**)
Range from weak sources, F. N. D. Kurie—865 (A)

Astrophysics
Bands of CH and CN in stellar spectra, P. Swings, O. Struve—142
Evolution of a rotationally unstable star, Ross Gunn—130
Magnetic storms, H. B. Maris—504
Origin of cometary spectra, Willi M. Cohn—182(A)
Origin of the solar system, Ross Gunn—311, 858 (A)
Spectral shift of light from distant stars, Herbert J. Brennen—186(A)
Stability of fluid sphere, Herman Roth—525

Atomic and molecular beams
Determination of nuclear spin, I. I. Rabi—864(A)
Methods of detection, J. Tykocinski-Tykociner—863(A)
Monochromatic de Broglie waves, I. Estermann, R. Frisch, O. Stern—546(A)
Of salt vapors, W. H. Rodebush, W. F. Henry—386(L)

Atomic and molecular radii (see **Collision diameter**)

Atomic structure (see also **Spectra, atomic**)
Dirac's equation and spin-spin interactions, G. Breit—616, 870(A)
Excitation energies of noble gases, L. C. Van Atta —1012(L)

Atomic structure factors
For polyatomic gases, Y. H. Woo—555
Of sylvine at low temperatures, G. E. M. Jauncey, G. G. Harvey—178(A)

Barkhausen effect (see also **Magnetic properties**)
Orientation in elementary domains, Richard M. Bozorth—353; discussion—373
Propagation of large discontinuities, K. J. Sixtus, L. Tonks—357; discussion—375

Beta-particles
β disintegration, Arthur Bramley—188(A)

Biophysics
Nature of ponderomotive forces between living cells, N. Rashevsky—188(A)

Book reviews
Brillouin, Léon. l'Atome de Bohr—851
——— Die Quantenstatistik und ihre Anwendung auf die Elektronentheorie der Metalle—852
Campbell, J. W. Numerical Tables of Hyperbolic and Other Functions—750
Casimir, H. B. G. Rotation of a Rigid Body in Quantum Mechanics—174
Edge, A. B. Broughton and T. H. Laby. The Principles and Practice of Geophysical Prospecting. Report of the Imperial Geophysical Experimental Survey—1022
Eggert, J. and E. Schiebold. Fortschritte der Roentgenforschung in Methode und Anwendung. Ergebnisse der technischen Roentgenkunde. II—388

Book reviews (continued)
Fajans, Kasimir. Radioelements and Isotopes: Chemical Forces and Optical Properties of Substances—751
Franck, Siegfrid. Messentlandungsstrecken (Ionenstrecken)—850
Frank, Philipp. Das Kausalgesetz und seine Grenzen—1025
Gamow, G. Constitution of Atomic Nuclei and Radioactivity—173
Gerlach, Walter and Eugen Schweitzer. Foundations and Methods of Chemical Analysis by the Emission Spectrum—853
Glasser, Otto. Wilhelm Conrad Roentgen und die Geschichte der Roentgenstrahlen—388
Gmelin's Handbuch der anorganischen Chemie—850
Henderson, William D. Problems in Physics—174
Hale, George Ellery. Signals from the Stars—389
Jahrbuch des Forschungs-Instituts der Allgemeinen Elektricitats-Gesellschaft. Vol. II, 1930—849
James Clerk Maxwell. A Commemoration Volume. 1831–1931—1024
Kassel, Louis S. The Kinetics of Homogeneous Gas Reactions—1023
Kepler, Johann. A Tercentenary Commemoration of His Life and His Work—387
Knopf, Adolph, E. W. Brown, Arthur Holmes, A. F. Kovarik, A. C. Lane, and Charles Schuchert. Physics of the Earth. IV. The Age of the Earth—543
Kohlrausch, K. W. F. Der Smekal-Raman Effect—541
Lenzen, Victor F. Physical Theory—387
Loeb, Leonard B. Fundamentals of Electricity and Magnetism—751
——— The Nature of a Gas—544
Milne-Thomson. Die elliptischen Funktionen von Jacobi—544
Northrop, F. S. C. Science and first Principles—849
Ribaud, Gustave. Traite de Pyrometrie Optique. Volume 4, Section 5 of Encyclopedie Photometrique—1022
Schiller, L. (ed.). Handbuch der Experimental physik. Hydre- und Aerodynamik, 1. Teil, Stromungslehre und allgemeine Versuchstechnik—541
Siegbahn, Manne. Spektroskopie der Roentgenstrahlen—388
Twyman, F. The practice of Spectrum Analysis with Hilger Instruments—852
——— and D. M. Smith. Wave-length Tables for Spectrum Analysis—750
van Arkel, A. E. and J. H. de Boer. Chemische Bindung als electrostatische Erscheinung—541
Whyte, L. L. Critique of Physics—1023
Wills, A. P. Vector and Tensor Analysis—851

Brownian movement
Effect on sensitivity of the resonance radiometer, G. A. Van Lear, Jr.—857(A)

Collision diameter
Of A atoms for 300 to 2500 volt electrons, Robert B. Brode—547(A)

Conductivity, electrical (see **Electrical conductivity and resistance**)

Constants, physical
Values of e, h, e/m and α, Raymond T. Birge—547(A)

Contact potentials
And "trapped" electrons, W. B. Nottingham—183(A)

Cosmic radiation
Comparison in the Alps and the Rockies, A. H. Compton—190(A)
Electroscope-constants as a function of pressure, Robert A. Millikan—397
Ionization-pressure relation, A. H. Compton, R. D. Bennett, J. C. Stearns—873
Magnetic deflection of cosmic rays, L. M. Mott-Smith—403
Range of fast electrons and neutrons, J. F. Carlson, J. R. Oppenheimer—864(A)
Specific ionization and "group" phenomenon, Gordon L. Locher—883
Uniformity of distribution, Robert A. Millikan—391

Crystals and crystal structure
Diffraction patterns of mixtures, M. Y. Colby—861(A)
Large artificial graphite crystals, Alexander Goetz, Alfred B. Focke, Alfred Faessler—168(L)
Lattice constants of solutions of Pb and Sn in Bi, Eric R. Jette, Frank Foote—1018(L)
Magnetic anisotrophy of colloidal crystals, Alexander Goetz, Alfred Faessler, A. B. Focke—553(A)
Magnetism of Bi crystals, Alfred B. Focke, Alexander Goetz—548(A)
Of NH_4HCO_3, R. C. L. Mooney—861(A)
Ruler and chart method of interpreting x-ray oscillation photographs; application to cerussite, Lucien LaCoste—861(A)
Specific heat and electronic activation in crystals, J. Elston Ahlberg, Simon Freed—540(L)
Stability of certain heteropolar crystals, H. M. Evjen—675

Crystals and crystal structure (continued)
Structure of magnesium platinocyanide heptahydrate, Richard M. Bozorth, Linus Pauling—537(L)
Thermal motions of atoms, B. D. Holbrook—177(L)
Of vitreous oxides, W. H. Zachariasen—185(A)
Critical potentials (see **Potentials, critical**)
Cybotactic state
Of ethyl ether and nitrobenzene, G. W. Stewart—176(A)
X-ray diffraction of ethyl ether, Waldemar Noll—175(A)
Diamagnetism (see **Magnetic properties**)
Dielectric constants
Polarization and moments of organic molecules, Louis M. Heil—666
Resultant moment of complex molecules, Henry Eyring—746(L)
Discharge of electricity in gases (see also **Electrons in gases**)
Negative point discharges, Willi M. Cohn—382(L)
Oscillations in corona discharges, J. T. Tykociner, W. A. Laning, Jr.—189(A)
Oscillations in ionized gases, J. Kunz—183(A)
Study with collectors of Ne discharge, Clifton G. Found, Irving Langmuir—237
Discharge of electricity in high vacua (see also **Thermionic emission; High voltage tubes and machines**)
Breakdown in cold emission, Willard H. Bennett—182(A)
High speed protons without the use of high voltages, Ernest O. Lawrence, M. Stanley Livingston—862(A)
Dissociation
Energies of products in N_2 and CO, John T. Tate, W. W. Lozier—254
Dissociation, heat of (see also **Molecular structure and constants**)
Of K_2 and Na_2, F. W. Loomis, R. E. Nusbaum—89, 179(A)
Dynamics
Momentum in special relativity, W. V. Houston—548(A)
Spatial energy decay due to absorbing boundaries, H. H. Germond—859(A)
Stability of fluid sphere, Herman Roth—525
Earth's magnetic field
Seasonal variations in magnetic storms, H. B. Maris—504
Efficiency of ionization
Of N_2CO, O_2, NO, H_2 and C_2H_2, John T. Tate, P. T. Smith—270
Elasticity
Bending of thin plate, D. G. Bourgin—870(A)
Constants for granite, L. Don Leet, W. Maurice Ewing—868(A)
A kinetic theory for highly elastic gels, E. Karrer—857(A)
Electrical conductivity and resistance
Characteristics of the copper oxide rectifier, W. B. Pietenpol, G. W. Presnell—862(A)
Of contacts, J. Frenkel, A. Joffé—530(L)
Effect of pressure on the conductance of salt solutions, W. A. Zisman—151
Electrical breakdown in insulators, R. M. Bozorth, F. E. Haworth—845(L)
Superconductivity with respect to alternating currents, F. B. Silsbee, R. B. Scott, J. W. Cook, F. G. Brickwedde—379(L)
Of Ta up to 2600°K, C. L. Utterback. L. A. Sanderman—1008
Electrical circuits
Analysis of plate current, S. Leroy Brown—863(A)
Charge sensitivity of vacuum tube amplifiers, G. F. Metcalf—745(L)
Electro-optical shutter, Harold W. Washburn—688
Generation of combination and harmonic frequencies, C. P. Boner, Marian O. Boner—863(A)
Electrical oscillations and waves
Low frequency vibrations in Rochelle salt and quartz plates, W. G. Cady—862(A)
Ultra-short undampled waves, G. Potapenko—547(A), 551(A), 625
Normal and the dwarf waves, G. Potapenko—638
Electric moment (see **Dielectric constant**)
Electrolytes
Effect of pressure on the conductance of salt solutions, W. A. Zisman—151
Electrolytic cells
Effect of pressure upon the e.m.f. of the Weston cell, Thos. C. Poulter, Carter Ritchey—816
Electromagnetic theory
Application and interpretation of the Faraday fluxes, Anthony Zeleny—857(A)
Electricity as a natural property of Riemannian geometry, Cornelius Lanczos—188(A), 716
On the equations of Laplace and Maxwell, Karl F. Herzfeld—497
Wave mechanics of radiation and free particles, E. H. Kennard—435
Electrons
Continuous radiation of slow electrons, Leo Neledsky—552(A)

Electron diffraction
Corpuscular description, R. M. Langer—187(A)
Effect of magnetic field on reflected electron beams, E. Rupp, L. Szilard—864(A)

Electrons in gases
Dissociation of N_2 and CO, John T. Tate, W. W. Lozier—254

Electrons in metals
Surface-electrons, J. E. Nyrop—967

Electrons, scattering of (see also **Electrons in gases**)
In Argon, energy distribution, A. L. Hughes, J. H. McMillen—585, 865(A)
Collision cross-section of A atoms for 300 to 2500 volt electrons, Robert B. Brode—547(A)

Electro-optical effects (see also **Photoelectric effect and properties**)
Characteristics of electro-optical shutter, Harold W. Washburn—688

E/m
Values of e, h, e/m and α, Raymond T. Birge—547(A)
From the Zeeman effect, J. S. Campbell, W. V. Houston—601

Energy states of atoms (see also **Atomic structure; Spectra, atomic**)
Excitation energies of noble gases, L. C. Van Atta—1012(L)

Entropy
Of crystalline ammonia, T. E. Sterne—993
Of the universe, Pasquale Barreca—533(L)

Eotvos balance
Charts for readings, M. M. Slotnick—867(A)
Description, Donald C. Barton—867(A)
Suspensions, N. N. Zirbel, A. B. Bryan—857(A)

Errata
Die elliptischen Funktionen von Jacobi, Milne-Thomson, book review—544

Excitation of atoms and molecules
Excitation energy by electron impact of noble gases, L. C. Van Atta—1012(L)
Mean lives of atomic states of Cd, H. D. Koenig, A. Ellett—576
Theory of excitation of atoms by electron impact, W. G. Penney—467, 859(A)

Ferromagnetism (see **Magnetic properties**)

Fluorescence
Quenching in iodine vapor, M. Eliashevich—532(L)

Galvanomagnetic effects
A new kind of e.m.f. and the four transverse effects, P. W. Bridgman—702

Gamma rays (see also **Radioactivity**)
Klein-Nishina formula for absorption, Arthur Bramley—378(L)

Geophysics
Application of reflection seismograph, Eugene McDermott—869(A)
Asymmetry of sound velocity in stratified formations, Burton McCollum, F. A. Snell—868(A)
Calculation of motion from seismograph records, H. A. Wilson—867(A)
Continuous seismic waves, W. R. Ransone—858(A)
Correlation of isogeothermal surfaces with the rock strata, C. E. Van Orstrand—869(A)
Discovery of the Vermillion Bay Salt Dome, E. E. Rosaire, O. C. Lester, Jr.—869(A)
Earth-amplitudes in seismic prospecting, Maurice Ewing—868(A)
Electrical prospecting, Leo J. Peters, John Bardeen—870(A)
Geothermal gradient determinations, L. R. Ingersoll—869(A)
Reflection method, H. Rutherford—869(A)
Study of crystal layers by seismic waves, Louis B. Slichter, V. Gabrilovitch Gabriel—869(A)
Velocity of waves in granite, L. Don Leet, W. Maurice Ewing—868(A)

Hall effect
Applications of thermodynamics to four transverse effects, P. W. Bridgman—702
In Bi and Sb, Carl A. Beck—185(A)
In solid Hg, James T. Serduke, Thomas F. Fisher—831

High voltage tubes and machines
High speed protons without the use of high voltages, Ernest O. Lawrence, M. Stanley Livingston—862(A)
In production of high-speed protons, M. A. Tuve, L. R. Hafstad, O. Dahl—384(L)

Hyperfine structure
Paschen-Back effect in Bi II and Bi III, John Wulff, J. B. Green—181(A)
Paschen-Back effect in Th I, Th II and Th III, J. B. Green, John Wulff—181(A)
Of Pb in Ur bearing minerals, J. L. Rose, L. P. Granath—1017(L)

Intensities in spectra (see also **Spectra, etc.**)
Arc lines of Th, S. E. Williams, J. Herlihy—802
Quartet lines in Cu arc, C. W. Allen—55
Relative intensities of Raman lines, Sister Magna Werth—299
In singlet-triplet bands of diatomic molecules, Robert Schlapp—806

Ionization by impact (see also **Ionization potentials**)
Efficiencies in N_2, CO, O_2, NO, H_2 and C_2H_2, John T. Tate, P. T. Smith—270
Energies of products in N_2 and CO, John T. Tate, W. W. Lozier—254

Ionization potentials
Of N_2CO, O_2, NO, H_2 and C_2H_2 by electron impact, John T. Tate, P. T. Smith—270
Of O_2, Eugene W. Pike—534(L)

Ions, high speed
High-speed protons, M. A. Tuve, L. R. Hafstad, O. Dahl—384(L)
High-speed protons without the use of high voltages, Ernest O. Lawrence, M. Stanley Livingston—862(A)
Range of fast electrons and neutrons, J. F. Carlson, J. R. Oppenheimer—864(A)

Ions, mobility
Absolute values in pure gases, N. E. Bradbury—546(A)

Isotopes
Of B from spectrum of BO, F. A. Jenkins, Andrew McKellar—549(A)
Effects in polyatomic molecules, E. O. Salant, Jenny E. Rosenthal—161(L)
Of hydrogen of mass 2, Harold C. Urey, F. G. Brickwedde, G. M. Murphy, 164(L), 864(A), Walker Bleakney—536(L)
Of Pb in Ur bearing minerals, J. L. Rose, L. P. Granath—1017(L)
Of Te, K. T. Bainbridge—1021(L)
Of Zn, K. T. Bainbridge—847(L)

Kinetic theory of gases
A law of force, D. R. Kleeman—871(A)

Liquids (see also **Hydrodynamics**)
Oriented molecules at solid-liquid interface, William D. Harkins—190(A)

Luminescence
Of solid nitrogen, Joseph Kaplan—870(A)

Magnetic properties (see also **Thermomagnetic effects**)
Barkhausen effect, Richard M. Bozorth—353; discussion—375
Of Bi alloyed with Pb and Sn, Eric R. Jette, Frank Foote—1018(L)
Of Bi crystals containing foreign atoms, A. B. Focke, A. Goetz—548(A)
Diamagnetic susceptibility of the rare gas atoms, W. Rogie Angus—844(L)
Effect of impurities on ferromagnetism, T. D. Yensen—358; discussion—376
Hydrogenized iron, P. P. Cioffi—363; discussion—376
Interpretation of ferromagnetic phenomena, Francis Bitter—337
Magnetic anisotrophy of colloidal crystals, A. Goetz, A. Faessler, A. B. Focke—553(A)
Magnetization and thermal e.m.f.'s, S. R. Williams—368; discussion—377
Magnetization of single crystals, Francis Bitter—371
Magnetostrain and magnetoresistance, L. W. McKeehan—368
New experimental methods in ferromagnetism, S. L. Quimby—345
Of nickel colloids, Carol G. Montgomery—163(L)
Propagation of Barkhausen discontinuities, K. J. Sixtus, L. Tonks—357; discussion—375
Susceptibility, gyromagnetic ratio, and heat capacity in Sm^{+++} and Em^{+++}, Amelia Frank—119

Mechanics, quantum—atomic structure and spectra
Calculation of energy levels of C, Niel Freeborn Beardsley—913
Dirac's equation and spin-spin interactions, G. Breit—616, 870(A)

Mechanics, quantum—general
Excitation by electron impact, W. G. Penney—467, 859(A)
Local momentum, Lloyd A. Young—455
Radiation and free particles, E. H. Kennard—435
Transmission and reflection of wave packets, L. A. MacColl—859(A)
Uncertainty principle, E. L. Hill—187(A)
Uncomplete systems in quantum mechanics, J. Frenkel—532(L)

Mechanics, quantum—molecular structure and spectra
Normal state of LiH, Morris Muskat, Elmer Hutchisson—859(A)

Metastable atoms and molecules
In Ne discharge, Clifton G. Found, Irving Langmuir—237

Meteorology
Ionization in the upper atmosphere, E. O. Hulburt—977
Magnetic storms, H. B. Maris—504

Methods and instruments
Absorption by films on grating, Albert Smith—1013(L)
Calculation of errors by the method of least squares, Raymond T. Birge—551(A)
Charge sensitivity of vacuum tube amplifiers, G. F. Metcalf—745(L)
Charts for torsion balance readings, M. M. Slotnick—867(A)
Detection of inhomogeneities in the magnetization, Francis Bitter—185(A)
Determination of small quantities of radon and thoron, Robley D. Evans—1014(L)
Direct measurement of mean lives of atomic states, H. D. Koenig, A. Ellett—576
Double crystal x-ray spectrometer, P. A. Ross—550(A)
Eotvos torsion balance, Donald C. Barton—867(A)

Methods and instruments (continued)
Evaporation of platinum, John Strong—1012(L), H. E. White, S. S. Ballard, 545(A)
Heat treatment of fine metallic suspensions, N. N. Zirbel, A. B. Bryan—857(A)
A high-vacuum, high-speed diffusion pump, Harold T. Byck, I. Esterman—553(A)
Infrared technique, R. Bowling Barnes—562
Intense audio-frequency sounds, Newton Gaines, Leslie A. Chambers—862(A)
A laboratory apparatus for determination of g, P. H. Carr, R. M. Bowie—858(A)
Lens effect of pressure windows, Thos. C. Poulter, Carl Benz—190(A)
Low frequency vibrations in Rochelle salt and quartz plates, W. G. Cady—862(A)
Method of least squares, Herbert J. Brennen—189(A)
Molecular beams, I. Estermann, R. Frisch, O. Stern—546(A)
A new instrument for measuring very small differences in gravity, Kenneth Hartley—867(A)
Photoelectric effect of alkali vapors, Jakob Kunz—866(A)
Photography of alpha and beta-ray tracks, David M. Gans, William D. Harkins, D. A. Wallace—184(A)
Precision determination of thermal diffusivity, Richard H. Frazier—515
In production of high-speed protons, M. A. Tuve, L. R. Hafstad, O. Dahl—384(L)
Reflection seismograph, Eugene McDermott—869(A)
Resistance bridge thermometer, Loraine Decherd, Arnold Romberg—858(A)
Ruler and chart method of interpreting x-ray oscillation photographs, Lucien LaCoste—861(A)
Sensitivity of the resonance radiometer, G. A. Van Lear, Jr.—857(A)
Silvering of etalons by evaporation, H. E. White, S. S. Ballard—545(A); John Strong—1012(L)
Supercooling liquid copper, J. J. Hopfield—185(A)
Thermal expansion measured by x-ray reflection, A. Goetz, R. C. Hergenrother—548(A)
Thermonic frequency doubler, C. K. Stedman—184(A)
Thermionic work function by photoelectric cell, Roscoe E. Harris—182(A)
An ultracentrifuge, J. W. Beams—858(A)
Ultra-short electromagnetic waves, G. Potapenko—547(A), 551(A), 625, 638
Voltage control by photoelectric cell, H. T. Clark, W. Kohlhagen—184(A)
Wilson cloud chamber for measuring range of α particles, F. N. D. Kurie—865(A)

Mobility of ions (see **Ions, mobility**)
Molecular beams (see **Atomic and molecular beams**)
Molecular structure and constants (see also **Spectra, molecular and Raman spectra**)
Configuration of N_2O, C. R. Bailey, A. B. D. Cassie—534(L)
Electronic states of Li_2, Wendell H. Furry—1015(L)
Heat of dissociation of K_2, F. W. Loomis, R. E. Nusbaum—89
Of the ICl molecule, Orrell Darbyshire—162(L)
Interaction of normal Be atoms with one in $2s2p$ state, W. H. Furry, J. H. Bartlett, Jr.—186(A), 210, 1015(L)
Moment of inertia of methane, J. G. Moorhead—83
Multiplets (see also **Spectra, atomic**)
Of P, F. A. Jenkins, Muriel Ashley—552(A)
Optical instruments (see **Methods and instruments**)
Paschen-Back effect
Of hyperfine structure in Bi II and Bi III, John Wulff, J. B. Green—181(A)
Of hyperfine structure in Th I, Th II and Th III, J. B. Green, John Wulff—181(A)
By use of molecular beam, I. I. Rabi—864(A)
Peltier effect (see **Thermoelectric effect**)
Photoelectric effect and properties (see also **Photoionization**)
Of alkali vapors; new method of study, Jakob Kunz—866(A)
Of Cd and Hg films, Duane Roller, Hughes Zenor—866(A)
Of contracts, J. Frenkel, A. Joffé—530(L)
Fowler's theory, experimental tests, Lee A. DuBridge—108, 866(A)
Of gas free Pd, Fowler's theory, Lee A. DuBridge, W. W. Roehr—99, 866(A)
Of O_2 and A; action of x-rays, Gordon L. Locher—866(A)
Surface-electrons, J. E. Nyrop—967
Theory; of metals, Ig. Tamm—170(L)
Of thin films of Rb and Cs on Ag, James J. Brady—546(A)
Photoionization (see also **Photoelectric effect and properties**)
Ionization in the upper atmosphere, E. O. Hulburt—977
Probabilities of atomic potassium, Melba Phillips—552(A), 905
Variation with pressure and temperature, A. H. Compton, R. D. Bennett, J. C. Stearns—873
Polarization of radiation
Of Cd λ2288A and λ3216A, A. Ellett, L. Larrick—181(A), 294
Of Hg λ2537A, L. Larrick, N. P. Heydenburg—181(A), 289

Potentials, critical (see also **Ionization potentials**)
Soft x-ray potentials of Be, R. J. Christensen—549(A)

Proceedings of the American Physical Society
175, 545, 854

Predissociation
A new criterion, Joseph Kaplan—180(A)
In SO, E. V. Martin, F. A. Jenkins—549(A)

Quantum mechanics (see **Mechanics, quantum**)

Radiation (see also **Thermal radiation**)
Absorption of infrared by small particles, A. H. Pfund, S. Silverman—64
Continuous radiation of slow electrons, Leo Neledsky—552(A)

Radio (see **Electric oscillations and waves**)

Radioactivity
β disintegration, Arthur Bramley—188(A)
Determination of small quantities of radon and thoron, Robley D. Evans—1014(L)
Isotopes of lead, J. L. Rose, L. P. Granath—1017(L)
New effect produced by action of x-rays on matter, Newell S. Gingrich—748(L)
Photography of alpha and beta-ray tracks, David M. Gans, William D. Harkins, D. A. Wallace—184(A)
Range of alpha particles from weak sources, F. N. D. Kurie—865(A)

Raman spectra
Of CS_2 S. Bhagavantam—1020(L)
Inner vibrations in molecules; carbon-halogen band, William D. Harkins, Harold E. Bowers—182(A)
Relative intensities of lines, Sister Magna Werth—299
Of water vapor, Herrick L. Johnston, Margery K. Walker—535(L)

Rectifiers
Characteristics of the copper oxide rectifier, W. B. Pietenpol, G. W. Presnell—862(A)

Relativity
Behavior of non-static models of the universe, Richard C. Tolman, Morgan Ward—835
Electricity as a natural element of Riemannian geometry, Cornelius Lanczos—188(A)
Experimental establishment of the relativity of time, Roy J. Kennedy, Edward M. Thorndike—871(A)
Momentum of a moving body, W. V. Houston—548(A)
Thermodynamics for irreversible processes without exhaustion of free energy, Richard C. Tolman—320

Resonance radiation
In Ne discharge, Clifton G. Found, Irving Langmuir—237

Scattering of electrons (see also **Collision diameter; Electrons in gases; Electron diffraction**)

Seismograph (see **Methods and instruments; Geophysics**)

Shot effect
And electrical breakdown in insulators, R. M. Bozorth, F. E. Haworth—845(L)
In space charge limited currents, E. W. Thatcher, N. H. Williams—474

Sound (see **Acoustics**)

Specific heat
Variations with temperature for Sm^{+++} and Em^{+++}, Amelia Frank—119

Spectra, absorption (see also **Absorption of light**)
Of the alkali halides; ultraviolet, Albert Smith—1013(L)
1,1 band of atmospheric O_2, Harold D. Babcock, Wendell P. Hoge—550(A)
Bands of Ch and CN in stellar spectra, P. Swings, O. Struve—142
By calcite in the infrared, S. Silverman—72
Of CN in ultraviolet, Sho-Chow Woo, Richard N. Badger—932
Effect of temperature on the bands of benzene at low temperatures, A. H. Croup—178(A)
Emission and absorption of BaF, F. A. Jenkins, A. Harvey—922
Enhancement of the iodine absorption of oxygen, F. W. Loomis, H. Q. Fuller—180(A)
Fine structure of bands of halogen derivatives of methane, John G. Moorhead—788
Fine structure of visible bands of Br_2, Weldon G. Brown—190(A), 777
Of the ICl molecule, Orrell Darbyshire—162(L)
Infrared bands of H_2O, E. K. Plyler—77
Infrared of formaldehyde vapor, John R. Patty, Harald H. Nielsen—957
Infrared lines of He, M. R. Wehr—796
Magnetic rotation spectra of K_2, F. W. Loomis, R. E. Nusbaum—89
Of M_2O and dissociation, Oliver R. Wulf, Eugene H. Melvin—180(A)
Near infrared of methane, J. G. Moorhead—83
Parallel type bands of NH_3, David M. Dennison, J. D. Hardy—938
Ultra-violet spectrum of ozone, A. Jakowleva, V. Kondratjew—533(L)

Spectra, atomic
Broadening of Cu arc lines, C. W. Allen—42
Calculation of energy levels of C, Niel Freeborn Beardsley—913

Spectra, atomic (continued)
Of Cs II, O. Laporte, G. R. Miller, R. A. Sawyer—458
Intensity of quartet Cu lines, C. W. Allen—55
Perturbed series, A. G. Shenstone, H. N. Russell—415
Of Ra, classification of lines, Walter Albertson—385(L)
Of Sb II, R. J. Lang—538(L)
Of Si II, P III, S IV, Si III, P IV and S V, I. S. Bowen—8, 551(A)
Theory of complex spectra, M. H. Johnson, Jr.—197
Width of D lines, S. A. Korff—549(A)
Zeeman effect of the K II spectrum, Albert E. Whitford—898

Spectra, continuous
Effect of heat on Hg bands, J. Gibson Winans—745(L)
Origin of cometary spectra, Willi M. Cohn—182(A)

Spectra, general
Luminescence of solid nitrogen, Joseph Kaplan—870(A)
Negative point discharges at low pressures, Willi M. Cohn—382(L)
Pressure shift of spectral lines, Henry Margenau—860(A)
Retection spectra in solids, Frank H. Spedding, Richard S. Bear—948

Spectra, molecular (see also **Molecular structure and constants**)
Absolute value of transition probabilities, R. Ladenburg, S. Levy, G. Wolfsohn—180(A)
Of BaF, emission and absorption, F. A. Jenkins, A. Harvey—922
Of BaH, W. R. Fredrickson, William W. Watson—179(A), 753
Of CO_2, electron levels, H. D. Smyth—380(L)
CO_2 emission-spectrum in a Back box, R. F. Schmid—539(L)
Criterion for predissociation, Joseph Kaplan—180(A)
Of CS_2, S. Bhagavantam—1020(L)
Isotope effects, E. O. Salant, Jenny E. Rosenthal—161(L)
Of KH, G. M. Almy, C. D. Hause—178(A)
Nuclear spin of P from band spectrum, F. A. Jenkins, Muriel Ashley—552(A)
Red CN band system, F. A. Jenkins, Yale K. Roots, Robert S. Mulliken—16
Rotational analysis of the red K_2 bands, F. W. Loomis—189(A)
Of SO, E. V. Martin, F. A. Jenkins—549(A)
Of SrH, William W. Watson, W. R. Fredrickson—179(A), 765
Structure of Br_2 bands, Weldon G. Brown—190(A)
Zeeman effect, Λ-type, spin doubling in CaH bands, William W. Watson—278

Spinor analysis
Impulse-energy tensor, O. Laporte, G. E. Uhlenbeck—187(A)

Sun (see **Astrophysics**)

Symposia
Ferromagnetic symposium and conference at Schenectady, September 12, 1931—337

Thermal conductivity
Effect of transverse magnetic fields in Bi, E. J. Knapp—550(A)
Precision determination of thermal diffusivity; Ni, Richard H. Frazier—515

Thermal radiation
From Ta, 1000° K to 2220° K, C. L. Utterback, L. A. Sanderman—1008

Thermal expansions
Of Bi crystals by x-rays, A. Goetz, R. C. Hergenrother—548(A)
Of Cu alloys, Peter Hidnert—551(A)
Of electrolytic chromium, Peter Hidnert—186(A)
Of heat-resisting alloys, Peter Hidnert—856(A)

Thermionic emission of electrons
Space charge effects, using Fermi-Dirac statistics, N. H. Frank—226
Surface-electrons, J. E., Nyrop—967
Thermionic work function by photoelectric cell, Roscoe E. Harris—182(A)
Work function of gas free Pd, Lee A. DuBridge, W. W. Roehr—99, 866(A)

Thermionic emission of positive ions
From metals with impurities, H. B. Wahlin—183(A)

Thermodynamics
Kinetic interpretation of the Kelvin relations, E. A. Uehling—187(A), 821
Relativistic thermodynamics for irreversible processes, Richard C. Tolman—320

Thermoelectric effect
Applications of thermodynamics to four transverse effects, P. W. Bridgman—702
Change produced by a magnetic field, H. E. Banta—862(A)
And magnetization, S. R. Williams—368; discussion—377
Of Ta with Pt, C. L. Utterback, L. A. Sanderman—1008

Thermomagnetic effects
Four transverse effects, P. W. Bridgman—702
Transversely and longitudinally magnetized wires, Roland Schaffert—1017(L)

Vacuum tubes
Analysis of plate current, S. Leroy Brown—863(A)
Calculation of detection performance, J. P. Woods—863(A)
Generation of combination and harmonic frequencies, C. P. Boner, Marian O. Boner—863(A)
Vapor pressure
Constant of ammonia, T. E. Sterne—993
X-rays, absorption
In air, O_2 and A, R. G. Spencer—178(A)
M-series absorption edges of heavy elements, Charles Whitmer—176(L)
New effect produced by action of x-rays on matter, Newell S. Gingrich—748(L)
Peripheral x-ray levels, J. A. Eldridge—177(L)
X-rays, diffraction scattering, reflection and refraction
Compton line breadth in Ceylon graphite, Jesse W. M. DuMond—166(L)
Diffraction of ethyl ether at the critical temperature, Waldemar Noll—175(A)
Diffraction with two liquid phases, G. W. Stewart—176(A)
Patterns of mixtures, M. Y. Colby—861(A)
Reflecting power of strained quartz crystals, oscillating and non oscillating, Charles S. Barrett Carl E. Howe—177(A), 889
Ruler and chart method of interpreting x-ray oscillation photographs, Lucien LaCoste—861(A)
Scattering by polyatomic gases, Y. H. Woo—555
Scattering by polyatomic gases; note on above paper, G. E. M. Jauncey—561
Scattering from sylvine at low temperature, G. E. M. Jauncey, G. G. Harvey—178(A)
Thermal motions of atoms in crystals, B. D. Holbrook—177(L)
Variation of refractive index with wave-length, J. M. Cork—177(L), 193
Wave-length measurements by dispersion, J. A. Bearden—1, 860(A)
X-rays, emission
Comparison of 700,000-volt x-rays and gamma-rays, G. Failla—176(A)
Non-diagram lines, P. A. Ross—536(L), 748(L)
X-rays, spectra and spectroscopy
Double crystal spectrometer and spectrograph, P. A. Ross—550(A)
Soft x-ray critical potentials of Be, R. J. Christensen—549(A)
X-rays, tubes, apparatus
600 kv plant, F. K. Richtmyer, H. A. Barton, M. T. Jones—176(A)
Zeeman effect
In CaH bands, William W. Watson—278
Of K II spectrum, Albert E. Whitford—860(A), 898
Of the third positive carbon bands, R. F. Schmid—538(L)

CURRENT LITERATURE OF PHYSICS

Extracts from the Tables of Contents of Some of our Contemporaries

NATURE

VOL. 129, No. 3250 — FEBRUARY 13, 1932

Letters to the Editor:

Artificial Production of Fast Protons. By **J. D. Cockcroft and E. T. S. Walton** 242

Photochemical Reaction between Hydrogen and Chlorine in the Presence of Oxygen. By **Mowbray Ritchie and R. G. W. Norrish** 243

Co-ordination of Hydrogen in Associated Liquids. By **J. C. Speakman** 244

Oxygen and Everest. By **N. E. Odell** 244

Atomic Weight of Fluorine. By **H. S. Patterson, W. Cawood, and R. Whytlaw-Gray** 245

Structure and Development of Temperature Inversions in the Atmosphere. By **C. K. M. Douglas** 245

Melde's String Vibrated by Rotating Pulley. By **Satyendra Ray** 246

NATURE

VOL. 129, No. 3251 — FEBRUARY 20, 1932

Faraday's Alloy Steels. By **F. C. T.** 259

Photo-Elasticity. By **Alfred Ewing** 264

Letters to the Editor:

Nomenclature for Lines in the β-Ray Spectra of Radioactive Bodies. By **C. D. Ellis** 276

Distribution of Electrons in the Aromatic Nucleus and the Early Stages of Aromatic Substitutions. By **A. Lapworth and R. Robinson** 278

Surface Tension of Soap Solutions. By **P. Lecomte du Noüy** 278

Zodiacal Light and the Luminosity of the Night Sky. By **K. R. Ramanathan** 280

Polish on Metals. By **J. T. Randall and H. P. Rooksby** 280

Crystal Structure of β-Zirconium. By **W. G. Burgers** 281

ZEITSCHRIFT FÜR PHYSIK

VOL. 74, Nos. 3 and 4 — FEBRUARY 11, 1932

On the Theory of Non-Adiabatic Chemical Processes. By **F. London** 143

On Some Absorption, Fluorescences, and Emission Bands of Caesium. By **R. Rompe** 175

Solar Periodicity of the Hard Cosmic Radiation. By **W. Messerschmidt** 187

On the Fine Structure of the X-ray Absorption Edges. By **D. Coster and J. Veldkamp** 191

On the Anomaly of the Constricted Glow Discharge. By **Werner Koch** 209

Wave Equation of Kepler Motion in Momentum Space. By **Egil A. Hylleraas** 216

Roentgenographic Investigation of the Solubility of Silver in Copper. By **P. Wiest** 225

On the Band Spectrum of BaH. By **A. Schaafsma** 254

On the Transformation of Metals in the Solid Phase. III. Kinetic Calculations on the Basis of Atomic Theory. By **U. Dehlinger** 267

DIE NATURWISSENSCHAFTEN

VOL. 20, No. 7 — FEBRUARY 12, 1932

Position of the Theory of Relativity with Respect to other Physical Theories. By **Cornel Lanczos** 113

Short Original Contributions

On the Effect of the Lattice Forces on the X-ray Emission Spectrum. By **R. Glocker and M. Renninger** 122

On the Structure of Extremely Thin Crystalline Layers. By **F. Kirchner** 123

Spectrum and the Catalytic Effect of Imidazol-Haemine. By **W. Langenbeck** 124

Crystal Structure of Lithium Hydroxide. By **Th. Ernst** 124

COMPTES RENDUS

VOL. 194, No. 5 — FEBRUARY 1, 1932

Study of the Solar Corona with a Spectroheliograph Outside of Eclipse. By **Bernard Lyot** 443
Newtonian Potenial. By **N. Gunther** 446
Some Properties of Vacuum Thermocouples. By **J. Jaffray** 451
Intensity Measurements in Ultraviolet Spectra by Means of Photoelectric Cells Sensitized by Sodium Salicylate. By **André Chevallier and Pierre Dubouloz** 452
Action of an Electric Field on Gelatine. Effect of the Presence of an Indicator. By **Suzanne Veil** 454
Deposition Voltage of Electrolytic Copper in the Presence of Gelatine. By **P. Jacquet** 456

PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES OF THE U. S. A.

VOL. 18, No. 1 — JANUARY, 1932

Quantum Dynamical Correction for the Equation of State of Real Gases. By **Henry Margenau** 56
New Lines in the *K* Series of X-rays. By **William Duane** 63

BUREAU OF STANDARDS JOURNAL OF RESEARCH

VOL. 8, No. 4 — APRIL, 1932

Optical Requirements of Airplane Mapping. By **I. C. Gardner** 427
Note on the Moving Boundary Method for Measuring Transference Numbers. A Pycnometer for Determining the Volume Change Occurring at an Electrode and its Application to a Cathode of Silver Chloride in a Solution of Potassium Chloride. By **E. R. Smith** 428
Radio Field Intensity Measurements at Frequencies from 285 to 5,400 Kilocycles per second. By **S. S. Kirby and K. A. Norton** 429
Photographic Emulsion: Silver Ion and Hydrogen Ion Concentrations and Sensitivity. By **Burt H. Carrol and Donald Hubbard** 430
Capacitance and Power Factor of a Mica Capacitor as Measured at the Bureau of Standards and the National Physical Laboratory. By **Harvey L. Curtiss, C. Mathilda Sparks, L. Hartshorn, and N. F. Astbury** 431
Isolation and Determination of Normal Heptane and of Methylcyclohexane in a Mid-continent Petroleum. Including a Determination of the Phase Equilibrium Diagram for the Condensed System Normal Heptane-methylcyclohexane. By **Mildred M. Hicks-Bruun and Johannes H. Bruun** 432
Spectral Erythemic Reaction of the Untanned Human Skin to Ultraviolet Radiation. By **W. W. Coblentz, R. Stair, and J. M. Hogue** 433

JOURNAL OF THE FRANKLIN INSTITUTE

VOL. 213, No. 3 — MARCH, 1932

Extension of Paschen's Law to Include the Electrodeless Glow Discharge. By **Otto Stuhlman, Jr.** 273
Two-Dimensional Analysis of the Discrimination of differences in the Frequency of Vibrations by Means of the Sense of Touch. By **William H. Roberts** 283
The Dielectric Constant and Power Factor of Rosin Oil and Ethyl Abietate. By **S. O. Morgan and A. H. White** 313

JOURNAL OF THE OPTICAL SOCIETY OF AMERICA

VOL. 22, No. 3 — MARCH, 1932

Brock Process of Aërial Mapping. By **Edward H. Cahill** 111
Aërial Stereo-Photographic Mapping Instruments and Methods. By **C. H. Birdseye** 137
Apparatus for Motion Photomicrography on 35 mm Film. By **R. P. Loveland** 161
On Temperature Crests in Cando-Luminescence. By **E. L. Nichols and H. L. Howes** 170

THE REVIEW OF SCIENTIFIC INSTRUMENTS

VOL. 3, No. 3 MARCH, 1932

Wenner Potentiometer. By **Leo Behr** 109
Flexure Balance. By **Kenneth S. Cole** 121
Method of Measuring Small Capacitance. By **Roger Barton** 123
Multiple Nozzle Diffusion Pumps. By **T. L. Ho** 133
Construction of an Air Cooled Electromagnet. By **I. Walerstein and A. I. May** 136
Gas X-ray Tube for Crystal Structure Analysis. By **H. Kersten** 145
